

# Fair Latent Deep Generative Models (FLDGMs) for Syntax-Agnostic and Fair Synthetic Data Generation

Resmi Ramachandranpillai\*, Md Fahim Sikder\*, and Fredrik Heintz  
*Linköping University, Sweden*

## Key Contributions:

1. We propose a novel formulation of a fair latent generative framework
2. FLDGMs require zero regularizations of the latent space
3. FLDGMs can be generalized for any kind of data: Tabular, Image.
